

The Future of On-Premises Nitrogen Generation

Take Control of Your Nitrogen Supply. Expertise. Efficiency. Performance.

Introducing the N2GEN-FLEX Series by South-Tek Systems – a new line of skid-mounted nitrogen generators using patent-pending PSA technology. These systems deliver nitrogen at purities from 95% to 99.999% and flow rates over 2000 SCFH.

Designed for efficiency, they consume less compressed air and feature low pressure drop, saving energy costs. The scalable design allows you to add sieve beds to boost nitrogen output as needed. Sizes 2TS-8TS come with a 60-gallon storage tank mounted on the skid.

Up to 90% savings on nitrogen costs

Best-In-Class Efficiency: Patent-pending design delivers consistent performance, lower costs, and fast ROI.

Compact Design: Fits standard shipping containers and 36-inch doorways.

Scalable: Easily expand to meet growing demands.

Rapid Delivery: Simplified design reduces lead times and speeds up delivery.
